CAREER OBJECTIVE

Computer Science student who enjoys building full-stack web and mobile applications using JavaScript, Python, and frameworks like React, Next.js, and Node.js. Comfortable working with databases such as MySQL and MongoDB, and familiar with cloud platforms like AWS. Also has a growing interest in clean, user-friendly design using tools like Figma and Adobe XD. Looking for an internship as a Software Engineer or Front-End Developer to apply these skills on real projects and keep learning.

EDUCATION

B.Sc. in Computer Science & Engineering — Khulna University of Engineering & Technology (KUET)

Expected Graduation: 2027

Notre Dame College, Dhaka (Higher Secondary)

GPA-5.00

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C++, C#, C, PHP, Kotlin, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Node.js, React Native, .NET, Bootstrap, Tailwind CSS, Flutter, WordPress

Databases & Cloud Platforms: MySQL, MongoDB, PostgreSQL, Oracle Database, SQLite, Microsoft SQL Server, Firebase, AWS, Vercel, Netlify

Tools, Design & Systems: Git, GitHub, Docker, JWT, Apache, Apache Maven, Figma, Adobe XD, Canva, VS Code, Windows, macOS

ACADEMIC PROJECTS

Medixa — Digital Hospital Management System

Laravel, MySQL

Built a full-stack hospital management platform handling patient records, appointment scheduling, and doctor-patient assignment using Laravel's MVC architecture.

Designed a relational MySQL schema to manage multi-role access (admin, doctor, patient) and appointment workflows.

Club Portfolio Website

HTML, CSS, PHP, JavaScript

Developed a university club website with dynamic content management, event listings, and member registration using PHP and MySQL as the backend.

Implemented responsive front-end layouts and interactive UI elements with vanilla JavaScript.

TechHive Studio — Tech Company Portfolio App

Java, JavaFX, Android Studio

Designed and built a cross-platform company portfolio application showcasing services, team, and past projects, using JavaFX for UI and Android Studio for development.

Structured the app with reusable JavaFX components for consistent branding across screens.

Blind Stick — Smart Assistive Device (IoT)

ESP32, Ultrasonic/IR Sensors, Embedded C

Engineered a smart walking stick for visually impaired users, using ESP32 and multiple sensors to detect nearby obstacles in real time.

Implemented buzzer/vibration feedback logic to alert users of obstacle distance, combining embedded systems with practical accessibility design.

Additional Projects:

- **Shop Management System** — Inventory, billing, and transaction management built in C++ using OOP principles (classes, inheritance, polymorphism)
- **Student Library Management System** — Console-based system in C using structs, file I/O, and preprocessor directives for persistent record management
- **Digital Logic Gate Simulator** — Simulated core logic gates (AND, OR, NOT, NAND, NOR, XOR) to visualize digital logic design and truth tables
- **Shop Card & Management System** — Relational database design in Oracle for inventory and transaction tracking with SQL-based reporting
- **Personal Portfolio App** — Java-based application to present resume, skills, and projects in an interactive format
- **Branded Clothing E-Commerce Site** — AI-assisted rapid prototype featuring product catalog, cart, and responsive design
- **Hotel Booking Website** — Full booking flow and responsive UI built using AI-assisted development tools (Lovable, Claude)

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Computer Architecture, Web Engineering, Micro Processor and Microcontroller, Discrete Mathematics, Digital Logic Design

ACHIEVEMENTS

- Ranked in the top 15% among 200+ participants in a university-level Programming
- Selected to present the SwiftMart project at departmental Project Showcase Day, evaluated by a faculty panel.
- Finalist, Business Case Competition, proposing a data-driven retail growth strategy.
- Finalist, Hackathon, Programmiz hero competition.

LEADERSHIP & COLLABORATION

- Volunteered as event, a university-wide technical festival, managing logistics for 100+ attendees.

SOFT SKILLS & LANGUAGES

Soft Skills: Problem Solving, Communication, Teamwork, Leadership, Critical Thinking, Adaptability, Time Management

Languages: Bengali (Native), English (Professional Working Proficiency)
